Oklahoma City

TierPoint Oklahoma City tailors solutions to meet your unique needs.

Tierpoint Oklahoma's new DC2 facility is a carrier-class, carrier-neutral data center with enhanced construction features designed to battle the elements including enhanced resistance to wind and water with a reinforced foundation to withstand seismic forces. Built on our 15 acre data center campus, the facility is fortified to help ensure the safety and security of your data and systems, with tilt-up concrete panels surrounding each section of the building creating multiple layers of physical security.

Facilities

It all starts with our carrier-class, carrier-neutral facilities that give you uninterrupted access to critical data and systems. With uncompromising standards for power, security and environmental controls, we focus on connectivity and redundancy so you can enjoy peace of mind knowing your systems and data are protected and connected.

Solutions

We offer comprehensive connectivity, security, and availability solutions to ensure your business has the proper tools to succeed.

Expert Staff

Our highly trained, certified, experienced, team members have one goal and one goal only. They are committed to providing each client with individual attention and custom-fit solutions that meet their unique needs.

Cloud
Rely on TierPoint for cost-effective and flexible cloud computing solutions with the highest levels of security, reliability and performance.

Colocation
Choosing the right home for your critical apps and data goes far beyond the four walls of a data center. It's about trust, security and the personal touch.

Managed Services
Simplify and strengthen your IT infrastructure with TierPoint's Managed Services. With solutions ranging from security and business continuity to managed networks, we can assess your current state and recommend managed services that make the most sense for your business needs and your budget.

Disaster Recovery
Cover your organization's business continuity and disaster recovery needs with our customized DR solutions, tailored to meet your business requirements and budget.*

Available services may vary by location.
