

Data Center

DAL - DALLAS

TierPoint helps your organization manage risk, drive performance and improve agility. Our state-of-the-art facility in Dallas is part of a nationwide network of data centers that share our commitment to:

1. Carrier Neutrality and Redundancy

By having many on-net carriers and by supporting cross connects to other carriers, you get access to the Internet bandwidth and connectivity services of your choice.

2. Security and Compliance

Equally important is a company-wide emphasis on security and compliance, including the establishment of a national office to define and deploy best practices to serve client needs.

3. Responsiveness and Expertise

All of our data centers are supported by people who are passionate about client success, responsive to unique client requirements and who have the technical expertise and desire to help clients achieve their business goals.

DATA CENTER HIGHLIGHTS

- Facility operates in a priority power grid
- 68,000 sq. ft. facility with 51,300 sq. ft. of raised floor space.
- Management structure designed to allow local leadership to make decisions reflective of unique customer requirements
- Superior connectivity through 11 on-net providers with access to 65 additional providers through layer 2 connectivity
- Cloud pod enables 0 millisecond cross connections
- Average tenure of local management is 9-12 years

The DAL - Dallas facility is audited under SSAE 18 SOC 2 Type II, PCI-DSS*, GLBA and HIPAA standards annually and is ITAR and EU-US Privacy Shield registered.

PCI-DSS – Certification on PCI-DSS Requirement 9 & 12 (Physical Security and Information Security Policies) on data center (colocation) services. Colocation provides secure space, power, and environmental controls for merchants and service providers, some of which fall under PCI compliance. No logical access to any customer systems that may contain cardholder data
