- 24/7 Monitoring using CCTV cameras with high-definition automatic movement detection, digital recording and image storage for more than 90 days;
- Dual authentication for access control using biometric and magnetic cards;
- 24x7 on-site monitoring and security team.

Strategic location

Ascenty chose São Paulo to build its fifth data center. The site's special location is the ideal choice for companies looking for security and availability in order to host their data, with easy access to the country's main highways.

Avenida Roberto Pinto Sobrinho, 350, Osasco - São Paulo.

About Ascenty

Ascenty is a Digital Realty and Brookfield, company and Latin America's largest data center provider, with 17 data centers in operation and/or under construction, interconnected by a dedicated fiber-optic network spanning across more than 4,500 kilometers. The company has developed and operated world-class data centers since 2010, serving some of the world's largest technology companies. In line with Ascenty's expansion project, the company received strategic investment from Brookfield, one of the largest asset managers in Brazil in the segments of infrastructure and private equity. With Digital Realty, it is part of a global network of more than 210 data centers located across North America, Europe, Latin America, Asia and Australia.
